SKILLS

Programming Languages

- Java, C++
- Python, C Language

Web Technologies

- Html/css
- JavaScript
- Node.js, Express.js (Backend)
- Rest API Development
- JSON Handling

Database

- MongoDB
- SQL

Tools

- Git, GitHub, VS code

LANGUAGES

- English
- Tamil
- Hindi
- Japanese (learning)

INTEREST

- Full Stack Developer
- UI/UX Designer

CO-CURRICULAR ACTIVITIES

- NCC (A,B,C - certificate)
- Volunteer - Limca Book of Records (seedball rolling event)

PROFILE

Motivated Mechatronics Engineering student seeking a Full Stack Developer role. Skilled in Java, SQL, and web technologies with hands-on experience in building real-time projects. Eager to contribute to innovative software solutions.

EDUCATION

BANNARI AMMAN INSTITUTE OF TECHNOLOGY 2023 - 2027

- B.E - Mechatronics Engineering
- CGPA - 7.9 (Semester-5)

GOVERNMENT GIRLS HIGHER SECONDARY SCHOOL 2016 - 2023

- 12TH- 80%

PROJECT

- **Academic Learning Effectiveness Platform**

  Automated Academic Learning Effectiveness Platform (SkillBridge) is a full-stack web application designed to enhance academic performance by providing a centralized system. The platform offers an interactive interface for both students and faculty, improving transparency and efficiency in academic processes. It is developed using HTML, CSS, and JavaScript for the frontend, with Node.js and Express.js for backend development, and MySQL for database management. RESTful APIs and JSON are used to ensure seamless communication between system components, while Git and GitHub support version control and project collaboration.

- **Smart Aquaculture Monitoring Dashboard**

  Automated Smart Aquaculture Monitoring Dashboard is an IoT-based system that provides real-time monitoring and visualization of water quality parameters.The dashboard offers an interactive interface for tracking data, generating alerts, and supporting automated decision-making. It is developed using HTML, CSS, and JavaScript for the frontend, with Node.js and Express.js for backend processing, and integrates sensor data using APIs and JSON for efficient monitoring and management.

- **Automated fish feeding with water quality monitoring**

  Automated fish feeding system with water quality monitoring .The C++ is used to implement the automation logic, control feeding schedules, and provide real-time monitoring. It ensures remote monitoring and data analysis.

INTERSHIP

- ***Allison Transmission India Pvt. Ltd***
